COVID-19 Measures – Canine Appointments

Covid-19 has changed the way that we work. Precautionary measures must be in place in order to protect both the veterinary physiotherapist and owners.

Please inform me prior to my visit if any of the following is relevant to you or anyone else on the property:

- Exhibiting symptoms of Covid-19 (e.g. high temperature, persistent cough).
- Self-isolating
- Considered vulnerable

The following precautions must be undertaken:

- Limited contact time on the property; case history will be taken prior to the appointment via phone or email.
- Owner and vet reports will be emailed to you.
- Only one person to assist with your dog during assessment and treatment.
- A mask must be worn by everyone throughout the visit.
- Social distancing (of 2m) must be maintained.

Thank you for your co-operation.
